SURFACES / VIETNAM

Flooring collections

Wood-look SPC, herringbone and stone, with LVT and indoor WPC collections.

For distributors, retailers and private label

Explore the range, shortlist samples and compare formats.

CONTENTS

The flooring collection

Explore the decors and room settings, then compare construction, formats and installation systems in the technical guide.

03–04
Wood-look SPC
Four complementary tones, followed by ten further wood decors.

05
Herringbone
See how the layout changes the look, and compare the universal plank option.

06–07
Stone-look SPC
Soft mineral surfaces, expressive marble and 400 × 800 mm stone tiles.

08–11
LVT & indoor WPC
Woven and mineral looks, oak palettes and indoor WPC collections.

Construction guide 12

Sampling and enquiries 14

SPC / BEST SELLERS

Four tones for a first sample set

Use one natural base, a pale alternative, a cooler neutral and a deeper accent. Compare them in the same light before settling the range.

Honey Ridge Oak · EV-SPC-001

Honey Ridge Oak
EV-SPC-001
Warm base

Tidal Grain
EV-SPC-016
Pale alternative

Ashen Oak
EV-SPC-002
Cool neutral

Smoked Umber
EV-SPC-003
Dark contrast

Individual decor profiles and specifications are available in the companion **SPC Best Sellers** catalogue.

SPC / WOOD-LOOK PLANKS

From washed timber to deep grain

Pale boards give the palette a lighter starting point. Charcoal, espresso and amber grain give a showroom range more contrast.

Wood-look SPC · room scene

Cedarbrook Oak
EV-SPC-041

Oakmere Brown
EV-SPC-042

Amber Canyon Oak
EV-SPC-026

Suncrest Oak
EV-SPC-043

Goldenfield Oak
EV-SPC-044

Softlinen Oak
EV-SPC-045

Mossbank Oak
EV-SPC-046

Featherwood Oak
EV-SPC-047

Stonewashed Oak
EV-SPC-048

Whitehaven Oak
EV-SPC-024

SPC / PATTERN

The rhythm of herringbone

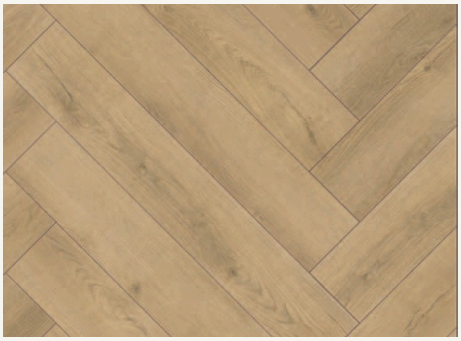

Compare the pattern at room scale. A laid sample shows how grain direction, board contrast and the joints read together.

Amberfield Oak · EV-HB-002

Ravencroft Oak
EV-HB-001
Dark oak herringbone

Amberfield Oak
EV-HB-002
Honey-toned herringbone

Cloudvale Oak
EV-HB-003
Pale oak herringbone

One universal plank

Both production routes offer a single plank type for the pattern, simplifying stock and carton handling. Click options are listed on page 13.

SPC / MINERAL FINISHES

Quieter surfaces, stronger accents

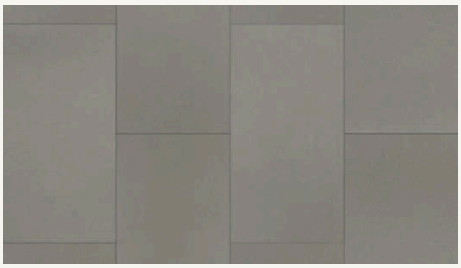

Use a soft concrete look as a neutral base, or choose a darker mineral texture where the floor should define the room.

Limestone Avenue · EV-MN-002

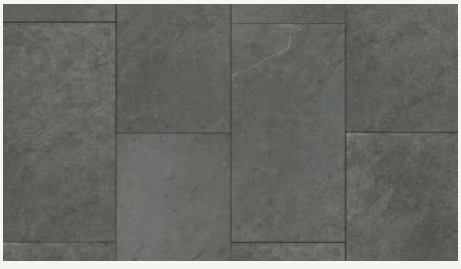

Haze Concrete
EV-MN-001
Deep concrete look

Limestone Avenue
EV-MN-002
Soft greige tile look

Pearlstone
EV-MN-003
Light mineral tile look

Noir Marble
EV-MN-004
Dark stone tile look

Slate Mist
EV-MN-005
Mid-grey concrete look

Pebble Terrazzo
EV-MN-006
Dark speckled cement look

SPC / 400 × 800 MM

Stone at a larger scale

Compare fine and bold veining beside quieter ivory, taupe and grey. Six tile decors from the same format make a focused stone display.

Alpine Veil
EV-TL-001
White marble with fine grey veining

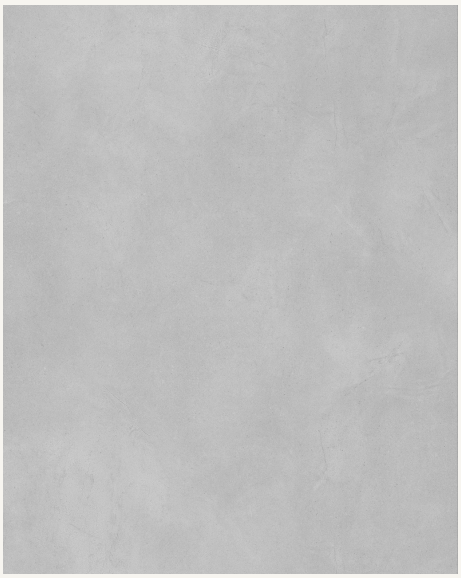

Ivory Courtyard
EV-TL-002
Ivory stone with a tiled effect

Taupe Crest
EV-TL-003
Warm taupe stone with light diagonal veins

Graphite Cloud
EV-TL-004
Charcoal with a clouded mineral look

Mineral Grey
EV-TL-005
Cool grey with a soft mineral look

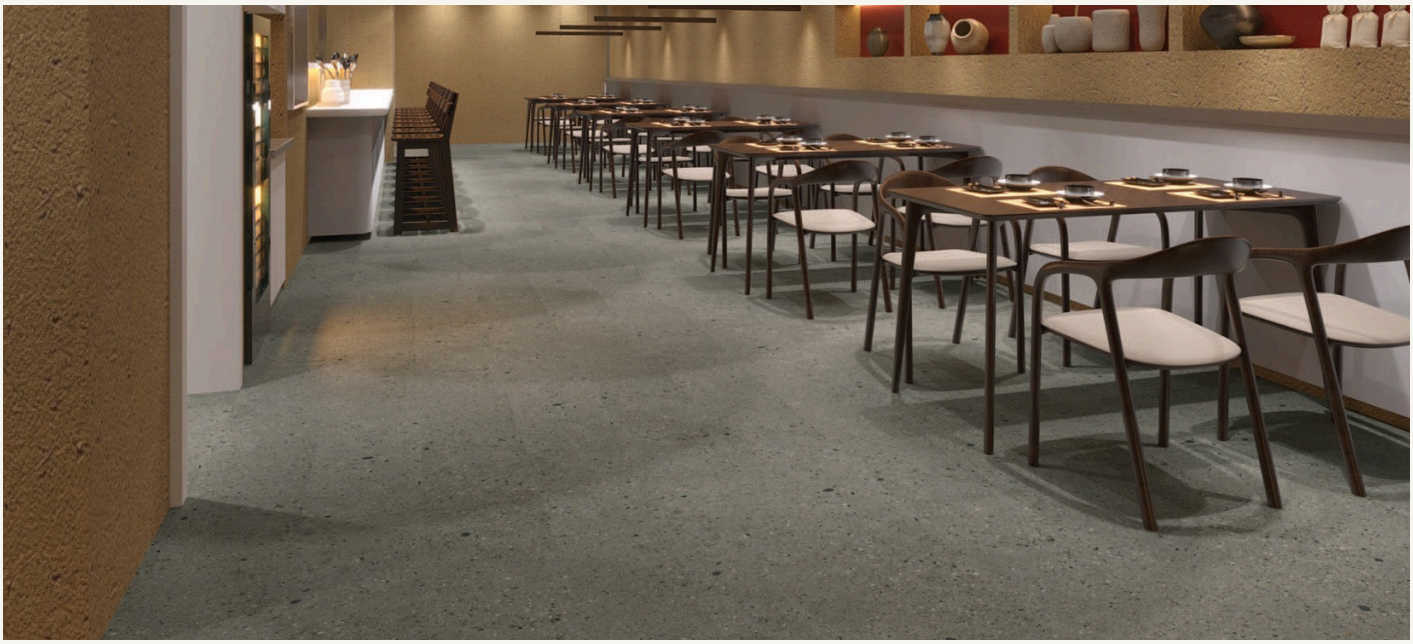

Glacier Marble
EV-TL-006
White marble with bold veining

Stone emboss and micro bevel
400 × 800 mm tiles. The documented 6.0 mm build and click options are listed on page 13.

LVT / WOVEN AND MINERAL

A softer visual texture

Woven looks bring fine pattern into a room. Terrazzo and linear stone offer a different surface rhythm. Select the laying method after checking the subfloor and use.

Ash Terrazzo · EV-LVT-006

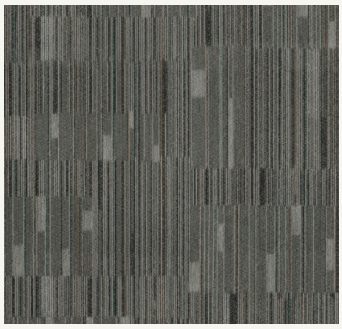

Honeyweave
EV-LVT-001
Woven Whimsy

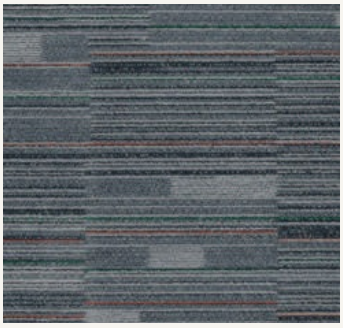

Cocoa Weave

EV-FL-023

The FL decor palette can be specified for SPC or indoor WPC. The core, backing, format and locking system are selected separately.

SPC & INDOOR WPC / SHARED DECOR PALETTE

One palette, two constructions

Choose the wood tone and grain first. Use the same decor direction for SPC or indoor WPC, then select the construction and format for the project.

Sandbar Oak · EV-FL-001

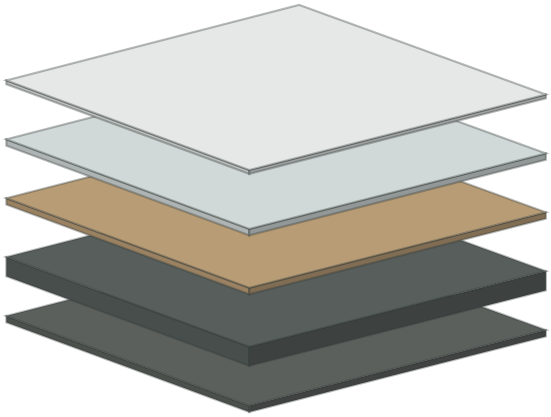

Obsidian Oak · EV-FL-004

Indoor WPC construction is illustrated on page 12. Formats are listed on page 13.

SPECIFICATION / CONSTRUCTION

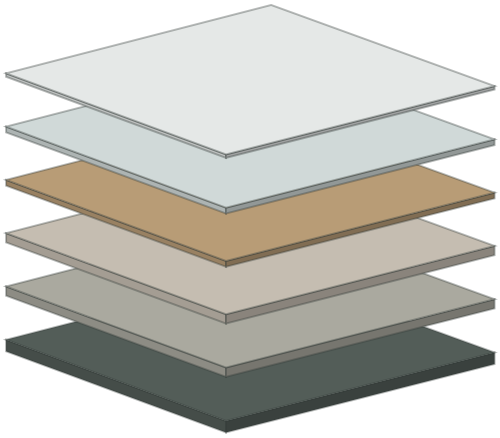

Match the build to the installation

For SPC, specify core, total thickness, wear layer, backing and lock as one assembly. For LVT and indoor WPC, compare the build and installation method together.

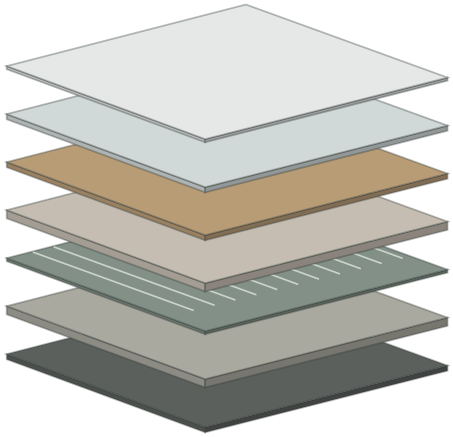

Dryback

2–3 mm · Glue-down construction with a balancing back layer

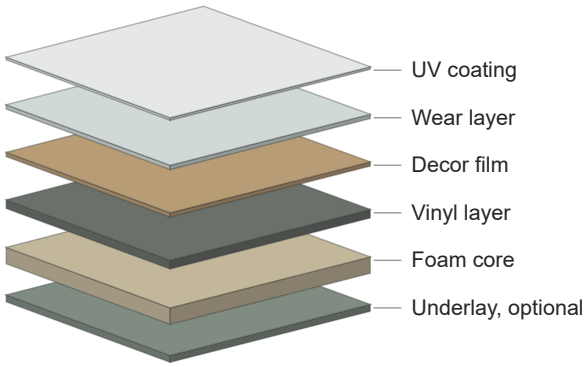

Loose lay

4.5–6 mm · Friction-grip backing for suitable substrates

Multilayer

3.5–5 mm · Available with or without fibre mesh

Indoor WPC

Foam core and vinyl layer under the decor, wear layer and UV coating. Optional underlay.

Layer diagrams are schematic. Formats and locking options are listed on page 13.

SPECIFICATION / TECHNICAL REFERENCE

Formats and click systems

Use these reference configurations to compare the range. Match the decor, format and lock on the final product specification.

SPC LOCKING OPTIONS	
Unilin / i4F range	Unilin Uniclic, Unizip and Unidrop, plus i4F.
Välinge / i4F range	i4F and Välinge 2G, 5G and 5G-i.

SELECTED SPC FORMATS	
Wood-look SPC	Example formats: 181 × 1220, 228 × 1520 and 228 × 1830 mm. The separate SPC Best Sellers catalogue gives specifications for its featured decors.
Välinge / i4F plank range	2.0–8.0 mm SPC core and 0.3–0.7 mm wear layer across the production range.
Stone-look tile	400 × 800 × 6.0 mm documented build. 4.5 mm core, 0.5 mm wear and 1 mm IXPE. i4F or 5G by configuration.

LVT AND INDOOR WPC FORMATS	
LVT formats	157 × 915, 189 × 1220 and 320 × 610 mm
WPC / 6.2–10 mm standard	147 × 915/1220, 182 × 1220/1524, 230 × 1220/1524/1800, 305 × 610 and 400 × 800 mm
WPC / 10.2–12.2 mm standard	147 × 915/1220, 180 × 1220/1524, 228 × 1220/1524/1800, 305 × 610 and 400 × 800 mm
WPC / 6.2–10 mm press bevel	228 × 1518 or 228 × 1530 mm

Formats and locking systems vary by construction and SKU.

PRIVATE-LABEL DEVELOPMENT

Start with the floor you want to sell

Send a reference board, a floor you already stock or a shortlist of codes from this catalogue. We use it to define the finished sample and compare suitable production routes.

Bronze Hickory · EV-SPC-006

Share the brief

Include your target channel, price position, expected volumes and the formats you need.

Approve the finished sample

Check colour, gloss and surface with the agreed lock and backing. Use the approved build to align packing and production checks.
