PRODUCT COLLECTIONS

Wall panels

Large-format reinforced hybrid panels and flat, slat and rounded rigid-core profiles. Compare constructions, explore the decor range and specify the finishing details for each wall.

RANGE GUIDE

Choose the panel for the wall

Compare four constructions for interiors, from broad wall runs to feature walls with visible relief. Choose the decor, joint and trim together.

UP TO 1,220 MM WIDE

Reinforced hybrid

p. 03

Cover broad surfaces with fewer visible joints. Select matt or high-gloss stone, wood and other finishes by decor.

400 / 600 / 950 MM WIDE

Flat rigid core

p. 11

Use a hollow-core panel for an even wall surface. Choose the width around the layout and joint positions.

228 MM WIDE

Slat rigid core

p. 12

Use parallel ribs to create a regular shadow line on feature walls, headboards and media walls.

155 MM WIDE

Round-profile rigid core

p. 13

Use rounded ribs for a softer relief and a gentler transition between light and shadow.

Two joint options
Groove-to-groove with metal trim, or tongue-and-groove click, by panel.

Waterproof*
Available on specified wet-area systems.

*Waterproof performance applies to the specified wall system when installed according to our installation instructions, using the approved substrate, adhesive, joints and sealant.

Trims and mounting	14	Project planning	15

Colours and grain are indicative. Physical samples are available on request.

LARGE-FORMAT SYSTEM

Reinforced hybrid panels

The reinforced hybrid construction uses a foamed core between vinyl layers. Larger formats can reduce visible joins across broad walls, and matt and high-gloss finishes give each decor a different character.

SPECIFICATION

Widths
305 / 600 / 950 / 1,220 mm

Length
2,400–3,200 mm

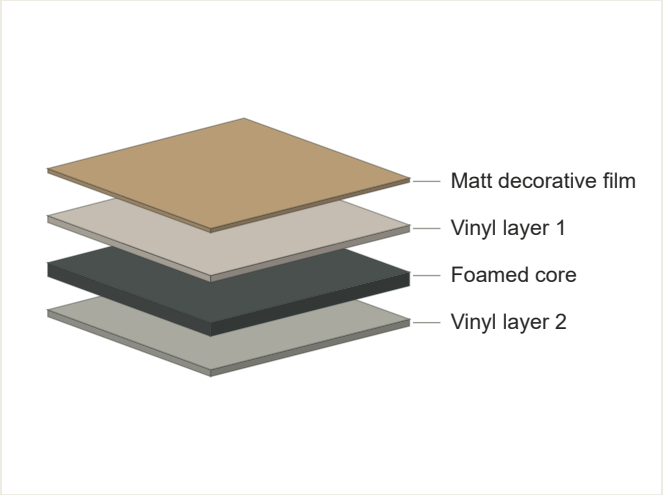

Thickness
6–12 mm

Factory standard
2,800 mm length · 8 mm thickness

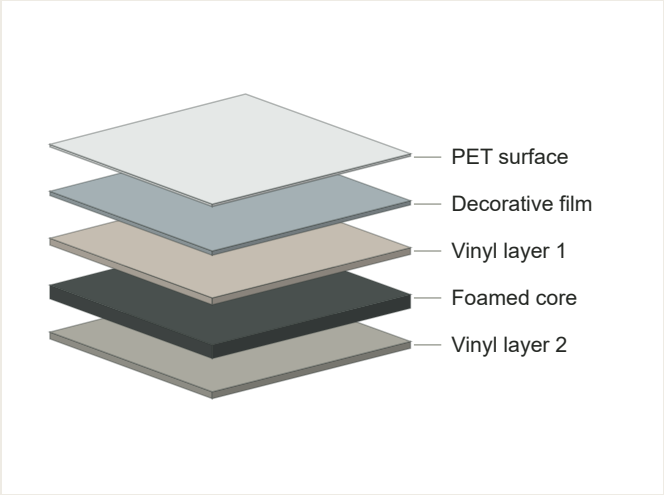

Finishes
Matt or high gloss

Decor print
Digital or roller, by design

SURFACE AND CORE LAYERS

Matt construction
Scratch-resistant decorative film · Vinyl layers · Foamed core

High-gloss construction
PET and decorative film · Vinyl layers · Foamed core

Schematic layer views. Confirm the size, finish, print route and joint for the selected decor.

REINFORCED HYBRID · STONE AND MARBLE

Milky Way collection

High-gloss stone and marble looks range from clouded neutrals to deep blue veining. Each swatch shows one face. The face count indicates the available pattern variations.

REINFORCED HYBRID · ACCESSORIES

Trims and mounting

Choose the profile with the panel. Plan panel joints, inside and outside corners, exposed ends, lighting details and mounting.

PROFILES AND MOUNTING HARDWARE

I-shaped trim
2,800 × 8 mm · Anodised aluminium · Matt or gloss
Finish a joint between adjacent panels.

Stepped trim
2,800 × 8 mm · Anodised aluminium · Matt
Use where the joint calls for a stepped profile.

Inner corner trim
2,800 × 8 mm · Anodised aluminium · Matt or gloss
Finish an internal corner.

Outer corner trim
2,800 × 8 mm · Anodised aluminium · Matt or gloss
Finish an exposed outside corner.

End trim
2,800 × 8 mm · Anodised aluminium · Matt or gloss
Close an exposed panel edge.

Recessed T trim
2,800 × 8 mm · Anodised aluminium · Matt
Create a recessed detail between panels.

LED groove trim
2,800 × 8 mm · Anodised aluminium · Matt or gloss
Provide a channel for a lighting detail.

Mounting plate
50 × 50 mm · Stainless steel · Gloss
Fix the panel using the specified mounting detail.

Profiles shown fit the listed 8 mm system. Confirm the profile and finish for the selected panel.

PROJECT PLANNING

Plan the finished wall

Work from the wall dimensions and the conditions on site. Agree the finished layout, corner and edge details before the first panel is cut.

Recessed lighting detail between panels

*Waterproof performance applies to the specified wall system when installed according to our installation instructions, using the approved substrate, adhesive, joints and sealant.

BEFORE ORDERING

01

Set the layout

Measure the wall and plan sheet widths, join positions, returns and cut-outs.

02

Confirm joints and edges

Choose groove-to-groove with metal trim or tongue-and-groove click for the selected panel. Agree corners, exposed ends and mounting.

03

Specify wet-area details

For waterproof* wall systems, specify the complete installation and sealing method for the intended exposure.

04

Approve the sample

Check decor, finish and joint fit on a physical sample. Plan batches, protective packing and project documentation before ordering.
